

# NAS POLKA PLATE

Stainless Steel Floor Plates – 3 to 6 mm thick

## NAS POLKA PLATES received the highest rating for anti-slip performance under German DIN standards

Nippon Yakin's stainless steel NAS Polka Plates have undergone slip resistance testing by the Institute for Occupational Safety and Health of the German Social Accident Insurance. They were found to be compliant with DIN (German Institute for Standardization) standard 51130, in which the slipping angle is measured when a person stands on a steel plate. The NAS Polka Plate has been rated as having the highest level of anti-slip performance (R13), superior even to the NAS Pattern Checkered Plate (R12) and the ASTM standard pattern B Checker Plate (R11).

Ratings	R9	R10	R11	R12	R13
Slip angle (degrees)	6~10	10~19	19~27	27~35	>35
